

Birlatech Presents Medical Stores Management System *Birlatech Medishop*

Birlatech™ the market leader company in Healthcare Software Solutions is a proud to add **Medical Stores Management Software** to their collection of **Birlatech Medical Management Software Series (BIMSS)**. We have been working on healthcare software solutions for many years and have developed a good deal of competencies in medical software field.

Birlatech Medishop system offers the pharmacy shops a modular integrated solution for their information needs. Designed by people with domain expertise and business experience, ***Birlatech Medishop*** is the state-of-the-art solution managing the purchase, sale and stocking of drugs / medical consumables, with complete analysis of sale and purchase ledgers.

Why Birlatech Medishop is so important for you?

Sale of drugs, Cash management and management of Stocks of drugs and Medical accessories at an optimum level at any point of time is the key focus in any pharmacy / medical store. ***Birlatech Medishop*** addresses these aspects very carefully. It caters to both independent pharmacies as well as pharmacies in a hospital.

Birlatech Medishop takes care of effective management of fast / slow moving items, drugs with expiry dates in near future are taken care of by the system. Reports and queries related to Brand-wise, profit margin-wise, Sales cycle-wise analysis of revenues generated from drugs form the highlight of the product.

Which Birlatech Medishop is most suitable for you?

Birlatech Medishop Single User version.

If you are a chemist having the daily counter of less than Rs. 7000/- will find ***Birlatech Medishop*** single user fit for your requirement.

Birlatech Medishop Multi User LAN version.

If you are a chemist having the daily counter of above Rs. 7000/- you will find ***Birlatech Medishop*** Stand alone version inadequate for you. Therefore, such a chemist needs to opt for LAN Version. The advantage of LAN Version is as follows:

- During the peak time i.e. at rush hours all the PCs (Personal Computer) can be operated for sales. This will help in serving a customer in quick time and will also ensure that no customer goes away.

- Since every PC can perform all the operation for standard daily operation, activity can be split between the different PCs connected through LAN.
- One PC for purchase entries and creating purchase orders.
- The second PC can be allocated for accounts and generating daily reports such as expiry, sales, products, and customer history.
- Owner can have one independent PC with using password facility and also can have control on cash management, sales and purchases, expiry goods and daily reports.
- Thus the LAN Version helps in carrying out number of operations simultaneously from any of these machines as well as comfort for owners to operate from an independent machine to access all information/reports as per the need.

Birlatech Medishop Hospital Version

This is an add-on module specifically designed for retail chemists attached to hospitals. The added facilities are as follows:

- To keep track of inward number, account name and patients' name.
- The statement can be generated for a specific patient as and when required as per user request.
- Another added facility is a special report that gives voucher-wise sales and date-wise sales for a given period.
